

Frick Services, Inc.

June, 4th, 2008

Dear Customer,

Recently Bayer CropScience LP , Nufarm Americas Inc., Control Solutions and Etigra issued a press release in relation to the settlement of lawsuits regarding infringement of Bayer's patent for the imidacloprid on fertilizer.

The Press release included a statement that " Etigra , Control Solutions and Frick Services are endeavoring to recall infringing imidacloprid product".

We have received expressions of concern from some customers that they will be required to return finished products supplied by Frick containing imidacloprid.

This is not the case. The reference to "infringing product' in the press release is a reference to technical material and is not intended to refer to end use products as supplied by Frick to its customers.

Frick formulates the technical material into IMI plus fertilizer under the Pro Ap brand which are then supplied to its customers.

In future Frick will be supplied with the technical material by Nufarm. Nufarm has purchased the assets of Etigra, the previous supplier to Frick of the imidacloprid and is in a position to supply this technical material to Frick.

We wish to assure you, as our valued customer, that Frick can continue to supply you with Pro Ap branded IMI plus fertilizer and that you will not be required return any Pro Ap branded IMI plus fertilizer.

Should you require any further information please do not hesitate to contact us.

Tim Kehoe

Manager Pro Ap Products Division
